## Who We Are

Daco Enterprises, Inc. was founded in 1985 with one goal in mind: delivering quality and reliable stone and masonry products to their local community and the nation as a whole. Our unparalleled and diverse selection of stone veneers from the major brands in the industry such as: Cultured Stone, Eldorado, Horizon Stone, ProStone and of course, Daco's own REAL Cut Stone Veneering, sets us apart as the go-to showroom for all of your solid stone solutions. With growth in mind, we are consistently updating our featured product lines in order to meet modern design expectations but still offer the classics we all know and love. For this, Daco has stood as a customer centric staple for all of your masonry needs.

## DIY Fireplaces : How It Works

Our DIY Fireplace kits were designed with you in mind. Each one of our kits has been specially designed to provide you or your contractor with all of the supplies needed to build your very own custom fireplace. Our kits all start with our Base Models and can be further customized with, trim, chimney tabletops, firewood storage, ect depending on the look you are trying to achieve. You also will be expected to choose your favorite stone veneering from our massive stone library as well as your hearth color and trim color (if applicable). Our kits are then palletized on-site and shipped directly to your residence using a flatbed lift gate service with included diagrams and instruction for installation.

# Custom Fireplace Kits

Since our fireplace kits are manufactured in-house we also have the ability to help bring your own custom designs and vision to life through your very own custom fireplace kit!

- 1) Think about and discuss what you would like for your custom fireplace to include and look like.
  - Research photos and styles online in order to solidify your vision
  - Discuss the size of your space and your fireplace size
  - Browse our online stone catalog for possible choices for your fireplace
  - Determine a budget you are aiming for with your custom kit
- 2) Email our design team at [stone@dacoenterprises.com](mailto:stone@dacoenterprises.com)
  - Include any helpful photos that accurately describe your vision (bad sketches included!)
  - Include you name, address, and a good contact number
  - Describe your situation in detail and what you are planning or are in need of for your custom fireplace
- 3) Our design team will go to work on mocking up your fireplace for your approval
  - The design process is by far the most time extensive, we ask for your patience during this process due to high demand
  - Your custom design will be sent back over to you for your approval
  - Once we receive your approval, your design will be sent to our estimating department to put together a quote for you.
- 4) If everything looks right, and your quote suits you, upon receiving your prompt payment we will begin working on putting together your vision from scratch!

# Frequently Asked Questions

## **Do I need a footer for my kit?**

Yes, we recommend a poured concrete footer to prevent settling over time. Footer depth will depend on the installation location. We always recommend contacting an engineer to determine your footer depth.

## **Will I need any special tools?**

For any cutting we recommend a diamond blade saw of some kind. A wet saw works the best but you could also use an angle grinder or circular saw. You will also need something to spread the mortar with and something to mix the mortar in.

## **Can I install this by myself?**

Yes, many of our customers install these kits single handedly within a weekend. If you have any issues with lifting things 50+ lbs you may want to arrange for another person to help you.

## **How long does it take to receive my kit?**

In a perfect scenario, our kits usually will arrive at your door within 2-3 weeks. This will depend on a number of scenarios such as the availability of the stone you choose, shipping delays, manufacturing delays, ect.

## **How long does the design process take on my custom fireplace kit?**

The design process can take anywhere from 1 day to multiple weeks. The time it takes to design your kit depends on a number of factors such as the complexity of your kit, the current demand load for CAD renderings, the amount of revisions you request, ect. We ask for your patience during this process! In order to make your design process run as smoothly as possible we request that you come prepared with the general design you are trying to create, all of your selections in order, dimensions figured out and above all submitting any changes you would like to see all at once and not individually.

## **What comes in the fireplace/firepit kits?**

Each fireplace kit includes the interior firebox, masonry block, mortar, stone veneering, firebrick, chimney sections, trim (if applicable), hearth pieces, and installation diagrams. You will only need the tools to install and a concrete footer.

## **When my kit is delivered, can they drop it next to my footer location?**

Our kits will be delivered using 3rd party flat bed delivery services that will offload your pallets using a pallet jack. Usually they will drop the shipment in your driveway or other **easily accessible** area. There is no guarantee that they will be able to drop it where you would prefer, there may be the need to walk material to the job site.

## **How long after installation do I have to wait to use my fireplace/firepit?**

There is a recommended waiting time so that the mortar is given time to set and dry. We recommend you wait at least 1 week before your first fire. The full curing process takes around 30 days total.

## **How close can I install the fireplace/firepit kit to my house?**

There are rules and regulations on how close you can install a wood burning or gas fireplace to your house. These regulations are usually set by your local municipality, we recommend you always double check your local building codes to determine where you are allowed to build your kit to avoid repercussions.

## **Does this come in an option for a gas log insert?**

At this time we do not offer a gas log option with these kits, they are sold as real wood burning outdoor fireplaces. These kits will accept a 3rd party gas log insert, and this has been done successfully with these kits in the past many times. We recommend contacting a local contractor for your gas line installation and hook up.

## **What options do I have for choosing my stone veneering?**

You may choose from any of the options shown on our our website. You can find our full selection in our Online Catalog which can be found at the following url:

<https://www.dacoenterprises.com/online-store/Stone-Veneers-c45809288>

## **I see there is a price difference between Tier 1, Tier 2 and Tier 3 stone veneer. How do I know which is which?**

**Tier 1:** All Horizon Stone

**Tier 2:** Cultured Stone & low-end Eldorado Stone

**Tier 3:** High-end Eldorado Stone & Daco REAL Cut Stone Veneers

## **I'd like my kit to be taller, is that possible?**

Each of the Fireplace kits do have an option to add chimney sections, they will increase the fireplace chimney by 6" for each additional chimney section added. The price includes any additional stone & mortar needed to accomplish this with your kit. Our fire pits can also be added to in height but not subtracted. Please contact us for a custom kit.

## **What choices do I have for my trim and hearth?**

You have a choice between a gray or hickory (tan) hearth in either flagstone or, for an additional charge, a single piece option.

## **What comes with the Firepit kit?**

Your kit will come packaged one pallet with the brick, mortar, firebrick, stone veneering, cap, and template necessary to build the firepit with ease.
